

## CLAIMS

I claim:

- 1        1. A relaxation lamp, comprising:
  - 2            a plurality of thin slats made from wood and coated with an
  - 3            oil-based polyurethane coating;
  - 4            a plurality of elongated moldings having longitudinally
  - 5            extending grooves defined therein, the moldings having a
  - 6            thickness greater than the slats, the slats being glued
  - 7            lengthwise between adjacent moldings to define an elongated
  - 8            tubular body having a top end and a bottom end and a
  - 9            substantially polygonal cross section;
  - 10           a bottom wall attached to the molding at the bottom end of
  - 11           the tubular body;
  - 12           a plurality of pegs extending inwardly into the tubular
  - 13           body adjacent the top end, the pegs being attached to the
  - 14           moldings;
  - 15           a light fixture disposed on the bottom wall of the tubular
  - 16           body; and
  - 17           a cover removably disposed at the top end of the tubular
  - 18           body, the cover resting on the pegs;

19 whereby the light fixture radiates a low intensity light having  
20 a soothing color in a darkened room to provide an atmosphere of  
21 serenity.

1 2. The relaxation lamp according to claim 1, wherein the  
2 slats are made from pitch pinewood.

1 3. The relaxation lamp according to claim 1, wherein the  
2 grooves in said moldings form a V-shape.

1 4. The relaxation lamp according to claim 4, wherein the  
2 elongated tubular body is formed from twelve slats and twelve  
3 moldings, the body having a substantially dodecagonal shape in  
4 section.

1 5. The relaxation lamp according to claim 1, further  
2 comprising a handle attached to said cover.
